PROFILE 👷

I'm a Software Developer with 3+ years of experience in web application development using Python, AWS, and Restful API. I am fluent in the Scrum Methodology, and I approach my work with a sense of responsibility, ensuring timely delivery. I am always willing to learn and thrive in collaborative team environments.

SKILLS ⚙️

Python

AWS

Docker

Git

MySQL

Airflow

REST API

Jira

Agile Scrum

EXPERIENCE 💼

REPS&Co, *software developer*

May 2022 - Present

I am part of a cross-functional team that develops and maintains a web application. I helped improve the application's stability by identifying and fixing bugs, standardizing resource definitions using AWS SAM templates, and integrating DataDog as a monitoring tool for the entire app. I increased a microservice success rate from 60% to 90%, positively impacting user experience.

DATYRA, *data engineer*

May 2021- April 2022

I was part of a project for an entertainment industry startup where a bunch of web scrapers to extract, transform, and load data were created to provide stakeholders with relevant data using dashboards generated using visualization tools.

AWARDS & ACKNOWLEDGEMENTS🏆

5th place. 2019 TMR, Autonomous Beach Cleaner Robots, Guadalajara 20+ participating teams.

LANGUAGES 🌐

Spanish (native)

English (Work proficiency)

EDUCATION 🎓

UTM, Huajuapan de León: *Masters in Robotic*

October 2019 - October 2022

UTM, Huajuapan de León: *Mechatronic Engineer*

October 2013 – July 2019
